

# Plastic Wrap

## Location

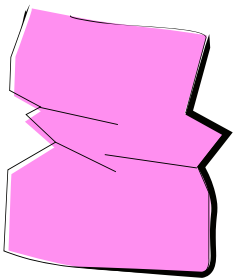

Throughout the city: retail areas, hospitality and industrial estates.

## Quantity

Unknown. Lightweight but large volume.

## Composition

Shrink wrap on pallets is usually LDPE or PVC and has often been heat-treated. Thick films encasing packaged goods may be HDPE. Please note that building material plastic wrap may contain fire-retardants and not be suitable for other uses.

## Description

Plastic wrap is a transport packaging that is commonly found across all industries. It will currently not be stored separately but will be going in the rubbish or recycling bin, depending on local infrastructure.
